DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/10/03 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation "the rigidity reducing arrangements" in lines 1-2 lacks antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Grabbe (US 5,173,055).

Art Unit: 3729

Grabbe discloses at least one receiving zone 10 in the middle of Fig. 1, a plurality of island-defining portions (10 outside of 10 in the middle of Fig. 1), a serpentine member (area between 10) and 10 are formed by forming recesses.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grabbe (US 5,173,055) in view of P. R. Theobald et al (US 3,723,176).

Grabbe discloses electrical contacts (tip of 18s) and an electrical terminal (16).

Grabbe fails to disclose depositing a metal layer to form a circuitry layer.

Theobald discloses depositing a metal layer to form a circuitry layer (50).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Grabbe by depositing a metal layer to form a circuitry layer, as taught by Theobald, for the purpose of preventing corrosion and increasing electrical conductivity.

8. Claims 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grabbe (US 5,173,055) in view of Fukutomi et al (US 6,568,073).

Grabbe fails to disclose etching the metal.

Fukutomi discloses etching the metal (Abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Grabbe by etching the metal, as taught by Fukutomi, for the purpose of providing burr-free surfaces.

Allowable Subject Matter

9. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

10. Applicant's arguments with respect to claims 1-3 and 6-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

11. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity. Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (703) 308-4784. The examiner can normally be reached on 5:30 AM to 1:30 PM, Monday through Thursday.
